

**BERKSHIRE CONTAMINATION CONTROL:
EXPERT TOOLS & CONSUMABLES TO
SUPPORT YOUR RESEARCH**

For 58 years, Berkshire Corporation has been a leader in providing top-quality products and solutions to the cleanroom and regulated industries. We recognize the vital role that our products play in supporting your cleaning and contamination control efforts, helping research and product development while minimizing the risk of introducing foreign debris or organic contamination into your operations. Our tools, along with our critical area wipers, swabs, and chemistry, provide a range of solutions. Whether you're creating a new cleaning protocol for your lab, working to eliminate existing contamination hotspots, or planning a protocol overhaul, Berkshire can offer the support and products needed to keep your research and product development free from foreign contamination. Empower your operations by starting the process with Berkshire or your local distributor representative. We're here to make the journey to contamination control as smooth and straightforward as possible.

Tooling for the cleaning of BSCs, Isolators, RAB, and smaller research areas.
